MEMORANDUM TO: SCRAP METAL VENDORS

FROM:

JOHN E. BREEN *John E. Breen*  
CHIEF, UTILIZATION, DONATION AND SALES  
US GENERAL SERVICES ADMINISTRATION  
20 NORTH 8<sup>TH</sup> ST  
PHILADELPHIA, PA 19107

SUBJECT: Invitation to a Pre-Bid Site Visit

The National Park Service has asked the US General Services Administration (GSA) to dispose of scrap metal located at a facility previously owned by the Rollock, Inc. scrap yard. This sale and the removal of the scrap metal must occur prior to the start of construction of the Flight 93 Memorial, which will open on 9/11/2011.

The scrap metal falls into nine categories, seven of which (see attached) the Government will sell via a competitive sealed bid auction. GSA will award each category individually, so the Government anticipates the award of multiple contracts. GSA will make the awards based on the highest per-gross-ton bid per each category. The actual sale price will be determined after the successful bidder(s) weighs the property at the point of removal on a Government-owned scale.

The purpose of this memorandum is to invite you to a pre-sale site inspection to survey the facility and the scrap metal. Additionally, the successful bidder(s) will have an opportunity to view the Government-owned scale that successful bidders will be required to use to determine the amount payable to the Government subsequent to removal.

If you would like to attend this event, which is scheduled for 10:00 AM on October 6, 2009, please RSVP to John E. Breen at either (215) 446-5070 or at [john.breen@gsa.gov](mailto:john.breen@gsa.gov).

All attendees will receive a copy of the eventual Invitation for Bid (IFB) via e-mail following the visit. Those who do not attend will not receive the IFB unless they request it prior to bid closing, which is yet to be determined.

If you have questions or concerns about this project, or the site visit, please feel free to contact John E. Breen.

## **CATEGORIES AVAILABLE FOR SALE**

### CAT 2: Light Mixed Material

- Approximately 2,504 gross tons;
- Appears to consist of auto parts, roofing, steel siding, and beverage machines;
- Located throughout yard in 4 locations.
